(Computer Science Engg. Branch)

SOFTWARE ENGINEERING & PROJECT MANAGEMENT

Time Allowed : Three hours

Maximum Marks : 100

Minimum Pass Marks : 35

Note : *Attempt all questions. Attempt any two parts from part (a), (b) & (c). All questions carry equal marks. State assumptions clearly (if any).*

Unit-I

1. (a) Explain JAD model with suitable example. In which situation JAD model will be used.

(b) Who are the Stakeholders in software engineering? What is the effect of Stakeholders during software development?

(c) Give an outline of step wise planning activities for a project with neat diagram.

Unit-II

2. (a) Plot HIPO chart and Warnier orr Diagram for Student Management system.

(b) What is Requirement Elicitation? Explain different Requirement Methods used during Software development

(c) Explain the earned value analysis methods.

Unit-III

3. (a) What is Project Scope Management and why is it important?

(b) Explain the relationship between people and effort management for product development phase.

(c) What is the phenomenon of outsourcing?Also explain types of outsourcing.

Unit-IV

4. (a) What is a Control Charl? What is the Seven Run Rule and why is it used in Control Charts?

(b) Is it possible to assess the quality of software if the customer keeps changing what it is supposed to do?

(c) Quality and reliability are related concepts but are fundamentally different in a number of ways. Discuss them.

Unit-V

5. (a) Explain how new staff can be selected and inducted into a project.

(b) List the factors that are involved in making a team. Explain the characteristics.

(c) What is risk management? How the risks are evaluated in software projects?
